

# **NEW RACECAR FACTORY MODIFIEDS** **BY STAR RACE CARS**

#21 LED FIRST 20 LAPS / #4 LED LAST 20 LAPS FOR THE WIN

## **The New State-of-the-Art in Modified Chassis**

West Coast Modified Racing is a super strong series with high car counts & tough competitors. Whether it be NASCAR sanctioned tracks, the Tri-Track series or the Lucas Modified series, the competition is deep & tough.

The newly designed RaceCar Factory Chassis, along with the advanced suspension set-up from the Star Race Cars Team, is a game changer. This car has 43 small, but significant, advantages over the current cars racing in the series.

Our race team has already won 3 races in this new car, with rookie drivers, over very tough, veteran competition. While meeting every rule to a tee, this car is simply a superior design in many ways.

### *RACE READY TO WIN*

RaceCar Factory/Star Race Cars have three main event wins with this new chassis just in the month of July. The dominating performance of the RSWC/Star Racing Team saw the team win on July 9th, combine to lead all 40 laps of the feature on July 16th, all 50 laps of the feature on July 30th, plus pick up two trophy dash wins.

"For years the Ellis Modified chassis has won the majority of races in Northern California. We feel this car is a game changer and that RaceCar Factory/Star Race Cars Modifieds will swing to that leaders position." - Ron Sutton

### *BARE CHASSIS*

#### *PRICE*

**ONLY \$4495**

\*Freight to Northern California only \$200.

Compare to Ellis Chassis at \$3995 & \$800+ freight costs.

You can afford higher technology for the same cost!
